SUMMARY

ISTQB Certified QA Engineer with 5+ years spanning manual and automated testing across healthcare, FinTech, and SaaS platforms. Built regression automation with Selenium (Java) and Playwright (TypeScript/JavaScript), plus Python scripting, alongside deep manual QA on HIPAA/HL7/ANSI/EDI compliance workflows. Took test coverage from 30% to 90% and authored 700+ test cases across four production products, validating 20+ releases within Agile/Scrum teams.

EXPERIENCE

SQA Analyst | Harris CareTracker | Contour Software

Jul 2025 – Present

- Own EDI compliance testing for ANSI X12 837P claims and 835 remittance advice files, validating payer-matching logic (entity, date, payer ID) to catch claims-processing errors before release.
- Execute SQL-based backend validation across billing, scheduling, and claims modules to confirm data integrity ahead of production deployment.
- Partner with Developers, Product Managers, and Business Analysts on defect triage and root-cause analysis for a HIPAA-regulated EMR and practice-management platform.
- Apply AI-assisted (LLM-based) analysis to speed up defect investigation, requirements validation, and test documentation.

Lead QA Engineer | We Over I

May 2024 – Jun 2025

- Automated end-to-end regression testing with Playwright + TypeScript/JavaScript for a Chrome extension and a tourism web application (Visit Kurdistan), with Python scripting supporting broader automation efforts.
- Grew test coverage from 30% to 90% across four products spanning healthcare, travel, and consumer tech by building comprehensive test planning and validation frameworks.
- Authored and maintained 700+ test cases covering UI, API, business-logic, and integration workflows.
- QA'd 20+ production releases end-to-end — exploratory, regression, integration, and E2E — safeguarding release stability.
- Mentored engineers on test design and defect-prevention techniques, embedding quality ownership earlier in the dev cycle.

Software QA Engineer | CureMD

Sep 2022 – May 2024

- Validated HIPAA-compliant EMR and practice-management workflows — billing, scheduling, claims, and clinical — for a platform used by healthcare providers globally.
- Built and maintained Selenium + Java regression automation for charge-creation and claim-filing workflows, reducing manual regression effort each release cycle.
- Automated test coverage for a new task-management module (APIs + frontend) added to the PM/EMR platform, building the automation suite from the ground up.
- Led defect triage across an 11-engineer team, coordinating testing efforts through release planning and production sign-off.
- Earned the Excellent Performance Award in year one for high-impact quality contributions.

Software Engineer – QA (FinTech) | i2c Inc.

Aug 2021 – Sep 2022

- Tested enterprise payment processing platforms for global banks, validating card issuing, authorization, and settlement workflows.
- Validated 3D Secure (3DS), fraud-prevention, and compliance features supporting Visa/Mastercard certification.
- Investigated and resolved 40+ client-reported issues through structured root-cause analysis.
- Delivered API testing and transaction validation across payment modules, plus onboarding sessions for enterprise clients.

SKILLS

Automation: Selenium (Java), Playwright (TypeScript/JavaScript), Python, Test Automation Design & Maintenance

Compliance & Healthcare: HIPAA, HL7, ANSI X12, EDI (837/835), Claims & Billing Validation, EMR / Practice Management

Testing Types: Functional, Regression, Integration, System, End-to-End, Exploratory, Smoke, UAT, Risk-Based

API & Backend: REST API Testing, GraphQL Testing, Postman, Insomnia, SQL (MySQL, SQL Server), Backend/Data Validation

Performance: JMeter, K6, Load / Stress / Scalability Testing

Tools & Process: Jira, Azure DevOps, GitHub, Agile, Scrum, Release Management, Defect Lifecycle Management

AI-Assisted QA: ChatGPT, GitHub Copilot, Prompt Engineering, AI Test Case Generation, AI-Assisted Root Cause Analysis

CERTIFICATIONS

ISTQB Certified Tester – Foundation Level (CTFL)

EDUCATION

Bachelor of Science in Computer Science (BSCS) — COMSATS University Islamabad, Lahore Campus
